ALFRESCO

ABOUT

We stand at the intersection of landscape and architecture, our work is founded in balance — between people and place — enhancing the Australian built environment through quality, design detail and durability that surpasses time and trends.

AUSTRALIAN MANUFACTURING

Quatro Design is synonymous with quality. To achieve consistent high quality and durability, our products are manufactured using modern and specialized GRC equipment.

The manufacture of GRC production requires a high degree of hands-on specialized labour coupled with close attention to detail.

Many of our employees are long standing and valued members of our team who understand GRC production and what is required to deliver consistent quality. These highly valued personal skills coupled with modern specialised GRC equipment is an important part of our manufacturing philosophy.

Each piece is checked during the manufacturing process to ensure compliance with our strict standards and to ensure that our products deliver on customer expectations.

We believe in the value of hand finishing all our products, with attention to detail that has been acquired over years of manufacturing and in supporting the development of our team.

We're proud of the support that we are able to give our local community and the role that we continue to play in enhancing the Australian built environment.

ALFRESCO

CIRCULAR BENCH SEAT

This Glassfibre Reinforced Concrete (GRC) circular seat planter easily adapts to its surrounding environment, its open base makes it easy to place around an existing column or tree, or the void can be filled with soil and plants.

It comes together in three parts, forming a cylindrical void behind the backrest. An optional internal cylinder planter is also available to contain soil and plants. To add to its versatility timber or upholstery inserts can be incorporated onto the bench seat and LED strip lighting can also be fitted to the base.

Visit quatrodesign.com.au for more information on our colour options, accessories, product specifications and drawings.
